Welcome to our Summer 1993 Fixed Price List offering of United States, Ancient, and World Coins. We take the pleasure in presenting this important selection of coins for your consideration.

A full range of **United States Coins**, both colonial and regular issues, as well as **Patterns** and **Territorial Gold**, are included in this Summer '93 Fixed Price List. Our offering includes **Early U.S. Medals**, featuring a **1792 Washington Half Dollar** and a **Washington Sampson medal**.

The Regular U.S. series commences with **Half Cents**, highlighted by a 1793. In the **Large Cent** series there are three different types of 1793, and a lovely date and variety offering through 1855. The **Small Cents** include many scarce and choice examples. Also in this minors series, there are wonderful selections of choice **Two Cent**, **Three Cent Silver** and **Nickel Pieces** and **Five Cent** coins. In the silver series a choice offering of **Half Dimes** can be found beginning with 1794. The **Dimes** include several lovely **Bust Type** specimens, and is followed by choice examples of the **Liberty Seated** series.

The **Quarters** include examples of 1796, 1806 and 1821 in the **Bust** series, and continue with outstanding examples of the **Liberty Seated** series. **Half Dollars** begin with 1795 and boast a good selection of **Bust Type**, **Liberty Seated**, **Barber** and **Liberty Walking** types. The highlight of the **Silver Dollar** section is a choice example of 1794. An attractive group of **Liberty Seated** and many choice **Morgan** and **Peace Dollars** are included. **Commemorative Silver** coins are included. In the **U.S. Pattern** series one can find various denominations represented, including a "Washlady" **Half Dollar** in **Copper** and a \$4.00 **Stella** in **Aluminum**.

The **Roman** section features a choice select group of gold including the very rare **Phoenix Aureus of Divus Trajan** and a **Solidus of Majorian**, one of the last Roman emperors. A small but nicely representative selection of **Byzantine Gold** and **Electrum** follows. The **Judaean Coins** include numerous attractive local bronzes, a fine group of **Second Revolt Silver**, and a attractive **Judaea Capta Sestertius**. The **Ancient** section concludes with a fine selection of **Roman Imperial Silver**.

A highlight of the **Foreign Gold** section is the very rare and possibly unique **Proof Bulgarian 20 Leva of 1894**. This is followed by a choice **Santiago 1751 8 Escudos of Ferdinand VI**, one of the finest from the **River Plate** hoard. STACK'S GRADING POLICY

For Mint State or Uncirculated coins

Stack's believes that adjectival grading is the best way to describe a coin. However, as numerical grading has become part of the grading vocabulary, Stack's wishes to define the adjectival and numerical grading as Stack's interprets it in this catalogue. Others may differ from this interpretation. See our Terms of Sale above for a full explanation.

Comparative Grading Language

Brilliant Uncirculated is at least MS-60 and means that it is probable that the coin has not entered general circulation; the coin may have heavy contact marks, noticeable hairlines and have original luster (or be impaired). It is the lowest state of preservation of uncirculated coins. Choice Brilliant Uncirculated is at least MS-63, which means that it has more attractive eye appeal than an MS-60, may have original or slightly impaired luster, may have a few scattered hairlines or even a small patch of hairlines; and may have some distracting contact marks in the field or design. Gem Brilliant Uncirculated is at least MS-65 and has very pleasing eye appeal (more so than an MS-63) and full lustre. It may have a few scattered hairlines and may also have a minimal number of contact marks. Scuff marks may show. STACK'S does not represent that a numismatic item has or has not been cleaned; that any toning is natural or artificial; that any coin catalogued will meet the standards, or the grade, of any third party or third party grading service. It should be understood by all that grading is a subjective art and that others may differ from these interpretations.
